Started with software development in 2010 I've finished an apprenticeship in 2013, where I mostly coded with C# .Net. While working full-time and switching to web technologies I finished a further education for business administration with focus on informatics in evening school.

I also started a German open source community for the Ionic framework and started talking at conferences and writing articles about web technology with focus on Ionic, Angular, NodeJS and Web Components. From 2017 to 2020 I was a team lead for a software development team at a local startup and switched to software consulting in 2020 at PlanB.

Experience

2010-09 – 2013-07

Trainee

cellent AG

The apprenticeship included basic knowledge of multiple programming languages, software architecture, computer science and network technology. It also included trainings on informatics consulting and supporting.

2013-07 – 2016-03

Junior Consultant/Developer

cellent AG

As a Junior developer I've started working on customers projects for different clients from the automotive, pharmacy and high-tech. During this time, I also switched from Microsoft technology focus (C#, .NET, Windows) to web technology with focus on Javascript and Open Source.

2016-03 – 2017-09

Developer

cellent AG / cellent GmbH

As developer I got the main responsible for web technologies at the Cellent AG. The company was/is a mainly Microsoft focused consulting company. I switch early to the web technology track and used at customers projects web technologies and frameworks. I also taught customers and internal colleagues for the new frameworks and possibilities with Javascript. Projects includes customers like Carl Zeiss, Boehringer Ingelheim, Daimler and many more.

- 2015-08 – 2018-08 **Founder**
WebAtlas GbR
The WebAtlas GbR was a web development agency which was founded by me and a friend from work. At this agency we developed different web solutions based on Javascript for web, mobile and backend. With different customers like Verivox we developed state of the art applications and using bleeding edge technologies. We discontinued the agency in 2018 because of other personal priorities.
- 2015-11 – 2020-08 **Trainer/Workshops for Angular**
Symetics GmbH/Workshops.de
As freelancer and member of the trainer team at Symetics I perform trainings and workshops for developers and/or companies in Angular development. The workshops and training events educate the knowledge and usage of the Angular framework and how to use it inside the daily life and companies' projects.
- 2017-09 – Present **Auditor of apprenticeship for informatics (volunteer)**
IHK Ostwürttemberg
As a member of the jury which conduct an examination of the apprenticeship for informatics.
- 2017-10 – 2020-08 **Head of Software Development (CTO)**
Conclurer GmbH
At the Conclurer GmbH we're building a digitalisation platform for the German machine industry. At the company I'm responsible for the developer team of six colleagues. I'm also planning with the company managers the main product and company strategies. Also, the support and maintenance of customers is a huge part. Taking requirements, combine them with others from other customers and create and influence the main product development.
- 2020-09 – Present **Solution Expert**
PlanB. GmbH
With focus on bringing web technologies into the PlanB. Company and provide know-how and knowledge on the Javascript topic for colleagues and customers I help them to achieve more in their daily life. Building software products with our customers which are use the could platform Azure from Microsoft I building applications on top of it using modern Javascript and web technologies.
